- Includes 75 professionally written chapters covering chronic & acute conditions encountered by school nurses
- Software automatically creates comprehensive care plans
- Includes 18 special-issue and concept chapters
- Each chapter provides in-depth information on a condition's pathophysiology, management, & assessment considerations

..... I1331 \$169.95 ea.

This comprehensive work details 57 chronic and acute conditions encountered daily by school nurses. Eighteen supporting chapters take a thorough look at many of the special issues and school nursing concepts along with unique student issues school nurses face in practice. Softbound, 991 pages.

Accompanying interactive software program aids in the development and creation of individualized healthcare plans that include 1) nursing diagnoses; 2) goals; 3) interventions; 4) outcomes; & 5) a column to add individualized assessment data. Detailed student demographic information is added to each care plan to provide a comprehensive and complete record for each student. Allows for multiple conditions and is compatible with both Windows and Macintosh systems.

In addition to 18 special-issue and concept chapters, this work includes more than 50 IHPs covering the following conditions:
