Clorox Commercial Solutions®

Clorox® Hydrogen Peroxide Disinfecting Cleaners

Don't Let Germs Take Over the Classroom

Kills bacteria and viruses in as fast as 30 seconds

Did you know many competitive products take up to 10 minutes to kill bacteria and viruses? By harnessing the unique power of hydrogen peroxide, Clorox delivers the fastest non-bleach contact times to kill bacteria and viruses in as fast as 30 seconds — significantly faster than other leading wipes on the market today.*

Registered to kill more germs of high concern

It's important that the disinfectant you choose kills the germs that are of greatest concern to public health. Clorox® Hydrogen Peroxide Disinfecting Cleaners are registered to kill more problematic germs than leading competitive products* — helping you better protect the school environment of students and staff from the spread of germs.

A Revolutionary New Way to Fight the Spread of Germs

A new solution from Clorox

Clorox is proud to offer patented and proprietary hydrogen peroxide technology that offers disinfecting and powerful cleaning — while doing so with a more earth-friendly active ingredient.

Better user experience

Clorox® Hydrogen Peroxide Disinfecting Cleaners are designed to be easier on those who use them on a regular basis.

- No harsh chemical fumes or smell
- Less irritating for skin
- No fragrances or dyes added
- Non-combustible, non-staining

Kills germs of public concern

When disinfecting, it's imperative that you are effectively killing the bacteria and viruses that can be most problematic to public health. Clorox® Hydrogen Peroxide Disinfecting Cleaners are EPA-registered to kill more of these high-risk germs than other competitive ready-to-use wipes and sprays on the market today.†

Proprietary and patented activated hydrogen peroxide technology

Contains biodegradable plant-based cleaning agents

No VOCs (volatile organic compounds) to help maintain good indoor air quality

FACTS ABOUT HYDROGEN PEROXIDE

Breaks down soil and stains, destroys odors and provides color-safe bleaching action.

An effective germ killer, it causes bacteria and viruses to quickly decompose, rendering them harmless.

Degrades quickly into water and oxygen after use, leaving no active residue behind.

Does not deliver troublesome gaseous release or chemical residues associated with other chemical oxidants.

CRITICAL PATHOGENS COMPARISON					
KILLS MORE GERMS OF HIGH CONCERN†	Hydrogen Peroxide Disinfecting Wipes	Hydrogen Peroxide Disinfecting Spray	Competitive Wipes:	Competitive Sprays§	
Number of antibiotic-resistant organism strains on master label	9	9	0-5	0-6	
Number of food-borne pathogens product is registered to kill	5	6	1-5	1-6	
Registered to kill multiple strains of <i>Staph.</i> aureus, including MRSA and CA MRSA	Yes	Yes	No except Spartan	No	
Registered to kill both strains of virus that are leading causes of common cold & flu	Yes	Yes	No except Seventh Generation	No except Seventh Generation	
TOTAL KILL CLAIMS	36	37	6-16	10-34	

[†] Based on disinfecting claims and contact times listed on product master label (as of Nov. 2011). See product label for specific pathogen kill claims registered with the EPA.

[‡] Wipes compared against: Lysol® Disinfecting Wipes (quat-based), Seventh Generation® Disinfecting Wipes (thymol-based), Spartan® Disinfecting Wipes (quat-based), PDI® Sani-Cloth Plus Wipes (quat-based).

[§] Spray compared against: Lysol® Brand II & Brand III All-Purpose Disinfecting Spray (lactic acid & quat-based), Betco® Anti-bacterial Cleaner Fight-Bac™ (quat-based), Spic and Span® Disinfecting All-Purpose Spray (quat-based), Seventh Generation® Disinfecting Multi-Surface Cleaner (thymol-based).

The Economics of Clean

Faster disinfecting

When you need to disinfect those high-touch "hot spots" (think desktops, handles, faucets, water fountains, toys, etc.) — you can't afford to use products that require long contact times to kill germs.

With Clorox® Hydrogen Peroxide Disinfecting Cleaners, you have the shortest contact times on the market today for non-bleach-based products* — so you can feel confident you are getting the job done, quickly and efficiently.

COMPETITIVE COMPARISON OF DISINFECTING DWELL TIMES† How long surface must remain wet to kill germs					
DWELL TIMES 3-10x FASTER	Hydrogen Peroxide Disinfecting Wipes & Spray	Competitive Wipes‡	Competitive Sprays (RTU)§		
BACTERIA*	30 sec-1 min	3-10 min	3-10 min		
VIRUSES*	30 sec-1 min	3-10 min	1-10 min		

Versatile one-step cleaner and disinfectant

Use Clorox® Hydrogen Peroxide Disinfecting Cleaners to clean and disinfect a wide variety of surfaces. From classrooms to recreational areas to nurse's offices — anywhere germs can lurk.

Not recommended for use on: aluminum, wood, natural stone, porous plastic, rubber

REDUCE THE COST OF ABSENTEEISM

Illness costs money and takes a toll in countless ways on your business or school. Improved hygiene may reduce the incidence of illness and absenteeism, resulting in significant savings for your facility. Two recent national studies indicate that the implementation of interventions that include surface disinfection result in a significant reduction in school absenteeism.¹

- * Based on disinfecting claims and contact times listed on product master label (as of Nov. 2011). See product label for specific pathogen kill claims registered with the EPA.
- † Dwell time noted for Clorox Commercial Solutions® Clorox® Hydrogen Peroxide Disinfecting Cleaners does not include kill claims for Norovirus, TB or fungi.
- * Wipes compared against: Lysol® Disinfecting Wipes (quat-based), Seventh Generation® Disinfecting Wipes (thymol-based), Spartan® Disinfecting Wipes (quat-based), PDI® Sani-Cloth Plus Wipes (quat-based).
- § Spray compared against: Lysol® Brand II & Brand III All-Purpose Disinfecting Spray (lactic acid & quat-based), Betco® Anti-bacterial Cleaner Fight-Bac™(quat-based), Spic and Span® Disinfecting All-Purpose Spray (quat-based), Seventh Generation® Disinfecting Multi-Surface Cleaner (thymol-based).
