

CPR in Schools Training Kit™

Teaching the Next Generation of Lifesavers

The CPR in Schools Training Kit is a fun and easy-to-use educational program designed specifically to meet the needs of school educators.

Why CPR Training is Important

Many Americans feel helpless to act during a cardiac emergency because they do not know how to administer CPR or they are afraid of hurting the victim.

The American Heart Association provides you with materials, teaching aids and online resources to start a program in your schools. Training high school students prior to graduation can add millions of trained rescuers and create our next generation of lifesavers.

CPR in Schools

Cardiac Arrest

is a leading cause of death in the U.S., but when ordinary people know and perform CPR, survival rates can **DOUBLE**, or even **TRIPLE**.

American Heart Association | American Stroke Association®

life is why™

CPR in Schools Training Kit™

- The premiere resource for facilitating a CPR in Schools training class for 10 to 20 students at once
- Designed to empower students to learn the core skills of CPR in under 30 minutes, and it teaches AED skills and choking relief
- Portable, allowing for convenient movement from classroom to classroom and easy storage
- The kit includes a facilitator guide, lesson plan, pre- and post-tests, and a facilitator training record
- Students can take home a manikin and DVD from the kit to train family and friends too

CPR in Schools Training Kit Includes

- 10 Mini Anne® Plus inflatable manikins
- 10 kneel mats with carry bags
- 10 practice-while-watching training DVDs
- 2 mesh collection and storage bags
- Hand pump for manikin inflation
- Classroom carry bag
- 50 replacement airways
- 50 manikin wipes
- 10 replacement face masks
- Facilitator Guide
