School Health is the Leading Provider of AEDs to Schools

Is your school prepared for an emergency?
Emergency Preparedness

THREE STEPS TO EMERGENCY RESPONSE

Because emergencies can occur at any time, there is a good chance that a crisis may arise at your school. By making sure emergency products are easily accessible and ready-to-use, improves the safety of students and faculty.

1 Preparation
Emergency situations can happen at any time, whether it is Sudden Cardiac Arrest or a natural disaster, the key to any emergency response program is preparation. In such a case, school and school personnel must have a plan in place to ensure the safety of students and faculty.

2 Communication
During an emergency, there is often a need for the principal, administrator, security staff, and other school personnel to communicate directly to the staff, students, and responders before their arrival.

When every second counts, efficient communication could translate into reducing injury, damage, and even saving lives. School Health can provide you the proper communication devices to keep you in constant contact, by voice or by instant message, with a mass group of people or a single person.

3 Evacuation
While each school’s individual programs and procedures vary, it is imperative that students and staff be well educated about the evacuation procedures. The key to evacuating all personnel safely is having the proper tools to get everyone to safety. Evacuation equipment helps increase the speed and efficiency of the evacuation of children and staff members, regardless of their mobility.

PREPARATION

Loop CPR Training System and Software
The LOOP Learning System is an interactive CPR skills practice system featuring fast-paced and fun learning games to improve and reinforce skills.

Features:
• Interactive CPR practice turns training into a more exciting and engaging classroom experience.
• Real-time performance feedback improves instruction by showing the instructor and the student what they need to improve upon.
• CPR training can increase a person’s confidence in a real world emergency.

ASHI AED/CPR Certification Training (2-Year Certification)

CPR/AED Training Program
This CPR/AED training program is accepted as an equivalent to the American Heart Association AED/CPR training with a focus on being a more standardized and convenient AED/CPR training class.

AED/CPR/First Aid Training for up to 12 Students, 2 Year Certification ........................................ 55580

AED Program Management Software
This self-managed AED Program Management software allows you to easily manage your entire districts AED devices and provides you the easy to use tools and allows full compliance reporting.

PREPARATION

**Prestan® Ulrlalite Manikin**
The Ultralite Manikin is amazingly easy to set up and is sold in a convenient and lightweight 4-pack for efficient training on-the-go. This durable manikin offers an affordable tool for CPR training, with all the quality and realism you expect from Prestan.

**Features:**
- Unique fast set-up and manikin is easy to clean
- Stackable torsos and heads generate a compact package for transporting multiple units
- Vinyl and latex free
- Compatible with AED trainer pads
- Anatomically correct design includes xyphoid process
- Realistic chest compressions to a 2” depth
- Realistic head tilt
- Visible chest rise with lung bag use
- Unique torso web design for realistic feel
- Three (3) year warranty

**Includes:**
- 4 Manikin Torsos
- 4 Manikin Heads
- 4 Compression Pistons
- Nylon Piston Bag
- 50-pack Face-Shield Lung Bags
- Nylon Carrying Case
- Detachable Shoulder Strap
- Instruction Sheet

**CPR in Schools Training Kit**
The kit contains everything needed to facilitate a CPR in Schools training class for 10 students at once. And the process can be easily repeated to train an entire class, a grade or even an entire school. One CPR in Schools Training Kit can train hundreds of students.

**Includes:**
- 10 Mini Anne Plus inflatable manikins
- 10 kneel mats with carry bags
- Practice-while-watching training DVD
- Hand pump for manikin inflation
- 2 mesh collection and storage bags
- Classroom carry bag
- 50 replacement airways (if you choose to practice CPR with breaths)
- 50 manikin wipes
- 10 replacement face masks
- Facilitator Guide
- 10 DVD’s

**Light, 10/pkg.** .......................................................... 55583
**Dark, 10/pkg.** ............................................................ 55587

**Laerdal® Pocket Mask™ with One-Way Valve**
Helping to protect both the patient and the rescuer. Reusable for manikin training. Easy to clean. For use on adults, children and infants. Latex-free.

**With Oxygen Inlet and Head Strap** ................................ 55040
**One-Way Valve Only** .................................................. 55042

OxySure™ Portable Emergency Oxygen System (Oxygen from powder)

A small, lightweight device which contains two proprietary compounds in a disposable cartridge. The two compounds are dry and inert until activated with a simple, single step which instantly creates medically pure (USP) oxygen without all of the dangers and problems inherent with traditional compressed sources of oxygen. The safe, reliable solution for individuals to store, carry and administer a source of on-demand, medically pure (USP) oxygen. FDA approved for OTC sale. Each replaceable cartridge comes ready for use with a new replacement mask.

Benefits of OxySure:
- User friendly, lightweight, portable and safe
- Ideal for lay rescuer use
- Non-compressed unit/oxygen on demand which eliminates need for testing
- One step activation for speed and ease of use
- Not a fire hazard

Motorola MJ270 Rechargeable Radio

Features:
- Range of up to 27 miles to keep in touch with emergency responders
- Emergency alert and flashlight
- NOAA Weather Channel for warnings of incoming storms or dangerous conditions
- 121 privacy codes
- Hands-free communication

2/pkg ................................. 19079

MobileAid® Trauma First Aid Station

Features:
- Dual-wheel design aides in rapid response
- Carry equipment on top
- Integrated seat
- Organized for quick access
- Includes flexible stretcher
- Durable, lightweight frame

42129

SecurEvac® Classroom Evacuation & Lockdown Kit

This portable emergency support kit is used for evacuating students and staff or supporting them in place during a lockdown or for the first several hours after an emergency or disaster.

Features:
- Includes supplies for up to 30
- High-visibility marking and flashing safety signal
- Breakaway tamper-evident closure ties keep supplies secure

Backpack ................................. 91094
Backpack with Easy-Roll Wheels ........... 91092

QuikClot® Bleeding Control Bag

Features:
- Integral for responding to a range of bleeding situations.
- Contains QuikClot® and other components developed to control bleeding.
- Design allows stand-alone or part of an bleeding control program.
- Orange, high visibility, backpack has two main compartments and two side pockets.
- Pack lays flat with internal mesh pockets for positive visual identification of components.
- Straps, carry handle and weighing 10 pounds, can be worn or transported to any location.
- Contents can treat up to 12 injuries.

AED DEVICES

Cardiac Science Powerheart G3 Plus

Features:
• Rescue Ready technology that self-checks all main AED components (battery, hardware, software, electrode pads, and adhesion gel on pads) daily
• RescueCoach and CPR metronome to pace chest compressions and help the user perform CPR.
• Warranty – 7 years on device; 2 years on pads; 4 years on battery
• Back lit text display guides the user through the rescue and is perfect for loud environments, areas with low light, or the hearing impaired. Text display also provides critical rescue information for emergency responders

The Powerheart AED G3 Plus features STAR biphasic technology which measures body mass and delivers a patient specific joule level required for resuscitation.

- Fully Automatic: 54193
- Semi Automatic: 54197
- Pediatric Pads: 54120
- Adult Pads: 54119
- Replacement Battery: 54235
- School Health AED Cabinet: 54241
- 2-year Annual Service: 54464

Physio-Control LIFEPAK CR Plus

Features:
• Device stores ECG data for wireless transmission through an infrared IrDA port to a personal computer
• Weekly and monthly self-tests - plus a visible readiness display with four indicators
• Capability to escalate to an industry-leading 360 joules when necessary
• Warranty – 8 years on device; 2 years on pads; 2 years on battery

- Fully Automatic: 54142
- Semi Automatic: 54146
- Pediatric Pads: 54059
- Charge-Pak w/1 pair Quick Pak Electrodes: 54047
- Charge-Pak w/2 pair Quick Pak Electrodes: 54048
- School Health AED Cabinet: 54241
- 2-year Care Advantage Program: 54370

Zoll AED Plus

Features:
• Audio and visual prompts help you rescue with confidence and clarity
• Extended defibrillator pad life reduces the total cost of ownership
• Intelligent Pediatric Capability
• CPR Feedback tool helps you perform proper compression rate and depth during CPR
• A one-piece electrode pad for fast and accurate placement
• ECG and voice recording
• Warranty – 5 years on device (7 when registered); 5 years on pads; 5 years on battery

The ZOLL AED features Real CPR Help, a tool that is able to actually see what you are doing and provide feedback to help you do it well, with no rescuer interaction required.

- Fully Automatic w/Soft Case: 54411
- Pediatric Pads: 54156
- Adult Pads: 54154
- Replacement Battery: 54153
- School Health AED Cabinet: 54241
- En-Pro 1-year Program Management: 1000021

SCHOOL HEALTH CAN SIMPLIFY YOUR AED MANAGEMENT PROGRAM

Implementing and maintaining supply and replenishment for AEDs goes far beyond the initial purchase. State and federal requirements, as well as liability protection, must be considered when any AED device is purchased. AED Program Management saves you time and effort in the implementation and maintenance of your AED devices. Ask your School Health representative about implementing a Program Management service that will keep your AED compliant.
**Emergency Preparedness**

**EVAC CHAIRS**

**Evac+Chair 300H**
- Simple single person operation
- Aluminum alloy chair for evacuation down multiple flights of stairs
- Belting system allows chair to glide on the edge of the stairs creating friction to slow momentum
- Firmly holds individual in chair
- Safety belt attaches across the waist, chest, and forehead to hold individual in chair.
- Folds compact and stores easily
- Instructional DVD teaches you how easy it is to unfold and operate
- Exceeds ADA /NFPA fire safety guidelines
- Weighs 19 lbs.
- Load Capacity: 400 lbs.

**Evac+Chair 500H**

The EVAC+CHAIR, 500 is a device which permits the safe egress of mobility impaired persons from a building in the event of an emergency or evacuation. A two person operation enhanced EVAC+CHAIR with an increased passenger payload capacity of 500lbs. and for use on steep stairs (45°).
- Increased payload capacity 500lbs
- Easy to use
- Lightweight (29lbs.)
- Suitable for 2 to 4 person operation
- Foldaway lower grip handles
- Foot rest
- Patient Restraints

**Evac+Chair 600H**
- Belting system allows chair to glide on the edge of the stairs while creating friction to slow momentum
- Simple single person use and designed with 2 extra handles for 2 person operation
- Firmly holds individual in chair
- Folds compact and stores easily
- Instructional DVD teaches you how easy it is to unfold and operate
- Comes complete with all needed accessories
- Exceeds ADA /NFPA fire safety guidelines
- Weighs 23 lbs.
- Load Capacity: 400 lbs.

**ResQmat Evacuation Mat**
- Designed to be used for both small children and adults
- Only Mat that easily adjusts to the passenger’s size
- Thick foam pad and vinyl coated base enables it to be easily moved over any surface
- Soft-absorbing head pillow reduces head movement going down stairs

**Evac+Chair Accessories**
- Evac Chair Transporter
- Evac Chair Comfy Seat
- Evac Chair Alarm
