Sanitizers containing alcohol have recently come under scrutiny as investigations of accidental ingestion, intentional ingestion, and even fires highlight the dangers of alcohol-based sanitizers. School Health offers alcohol-free alternatives to sanitize hands and surfaces.

School Health Brand Alcohol-Free Hand Sanitizer

School Health Brand alcohol-free hand sanitizers naturally moisturize the skin while killing 99.99% of germs. Using an FDA approved active ingredient, BAC, these products create significant “extended microbe killing power” and are an acceptable replacement to hand washing. School Health Brand alcohol-free hand sanitizer products are non-toxic, non-flammable, and skin soothing.
