RE: MSDS Request

Dear Customer,

Thank you for your interest in BSN medical Inc. (BSN) and FLA Orthopedic brand products. This communication is being sent in response to your recent request for a Material Safety Data Sheet. (MSDS).

BSN manufactures and distributes FDA Class I and Class II medical devices that are regulated under USA FDA 21 CFR Part 820 and most are Certified under the EU Medical Device Directive 93/42/EC. Most products are not considered to be or to contain hazardous chemicals based on evaluations made by our company under the OSHA Hazard Communication Standard 29 CFR 1910.1200, the EU Chemical Agents Directive 98/24/EC, and the Canadian WHMIS (Workplace Hazardous Materials Information System). Subsequently, these products do not require a MSDS. This letter is being provided for your files in confirmation of that fact for those products.

Certain other products such as some in the BSN Fracture Management product lines that are synthetic resin based and the FLA Therall Arthritis Therapy product line do contain chemicals that may, under certain circumstances, be considered hazardous and there is appropriate documentation in place for those products. The documentation can be provided for those products upon request.

If you have any additional questions or comment please feel free to contact me.

Best regards,

A handwritten signature in cursive script, appearing to read "Carroll Hoyle".
