Material Safety Data Sheet

Medegen Medical Products plastic products comply with all manufacturing and labeling regulation under the Federal Food, Drug and Cosmetic Act. With the exception of the H990 Sitz Bath, 02410 Shampoo Basin, 02083 Bucket Enema Set and 02084 Bag Enema Set, which contain PVC, Vollrath Group products should not fall under the regulations for toxic or hazardous substances.

Combustion of plastic material to reduce to ashes can produce carbon monoxide as a possible decomposition product. This is true of combustion of any other carbon counting materials such as wood, paper, etc. Disposal of products should be handled in accordance with Federal, State and local regulations.

Medegen Medical Products stainless steel products are manufactured from type 304 and 201 cold rolled stainless steel sheets. Decomposition products of these stainless steels are iron, manganese, nickel, silica, chromium and metal fume: Iron oxide.
